Salem Press Announces the Eleventh Volume in Our Principles of Science Series, *Principles of Climatology*

Salem Press is pleased to add *Principles of Climatology* as the eleventh title in the *Principles of* series that includes *Chemistry, Physics, Astronomy, Computer Science, Physical Science, Biology, Scientific Research, Sustainability, Biotechnology, and Programming & Coding*. This new resource introduces students and researchers to the fundamentals of climatology using easy-to-understand language for a solid background and a deeper understanding and appreciation of this important and evolving subject.

Edited by Richard Renneboog this edition includes over 120 entries arranged in A to Z order to help make finding a topic of interest easy. Each entry includes related fields of study to illustrate connections between the various branches of climatology, a brief concrete summary of the topic, principal terms that are fundamental to the discussion and to understanding the concepts presented, illustrations and photographs, and a further reading list that relates to the entry.

Entries in *Principles of Chemistry* range from one to five pages in length. Topics discussed include:

- Absolute Humidity
- Albedo
- Carbon Dioxide
- Climate
- Cold Front
- Condensation Level
- Dew Point
- Greenhouse Effect
- Hurricane
- Inversion
- Isobar
- Microclimate
- Prevailing Winds
- Rain Shadow
- Sea Surface Temperature
- Sublimation
- Plus Many More!

The book includes helpful appendixes as another valuable resource, includes the following:
Timeline of Periods and Events in Climate History;
Glossary
General Bibliography and Additional Reading; and
Subject Index

Salem Press and Grey House Publishing extend their appreciation to all involved in the development and production of this work. The entries have been written by experts in the field. Their names and affiliations follow the Editor's Introduction.
