## **Salem Press Announces the newest Volume in The *Principles of Science* Series, *Pharmacology***

Salem Press is pleased to add *Principles of Pharmacology* as the fifteenth title in the *Principles of Science* series. This new resource introduces students and researchers to the fundamentals of pharmacology using easy-to-understand language, to provide a solid background, and help readers develop a deeper understanding and appreciation of this important and evolving subject.

This edition includes 120 articles arranged in A to Z order to help make finding a topic of interest easy. Entries related to basic principles and concepts include fields of study related to the topic; an Abstract that provides a brief, concrete summary of the topic; Key Concepts important to a proper understanding of the topic; Text that gives an explanation of the background and significance; Illustrations that clarify difficult concepts via models, diagrams, and charts; and Further Reading lists that relate to each entry.

Entries in *Principles of Pharmacology* range from one to five pages in length. Topics discussed include:

- HIV Vaccine
- Macrolide Antibiotics
- Marijuana
- Narcotics
- Plant Alkaloids and Terpenoids in Chemotherapy
- Radiopharmaceuticals
- Serotonin
- Tumor Necrosis Factor (TNF)

This volume also includes several helpful appendixes, including:

- Timeline of Major Events in Pharmacology
- Nobel Prize Winners in Medicine and Physiology
- General Bibliography
- Glossary
- Index

Designed for students and researchers, this volume provides new ways to think about and study issues, policies, and practices in pharmacology. This will be a helpful addition to science and environmental programs at the high school, community college, and university levels.
