

Careers: Paths to Entrepreneurship

“Part of Salem Press’ *Careers* series, **this volume presents profiles of 25 careers** that would position a potential entrepreneur to pursue fields such as agriculture, bioengineering, fashion, finance, engineering, and technology. Each profile follows the same format, with a snapshot, a list of general attributes such as work environment and qualifications, an employment outlook, suggested coursework and certifications, and an interview with an entrepreneur in each field. **The writing is accessible and supplemented with appealing graphics and highlighted boxes to emphasize key points.** “Work Environment” and “A Day in the Life” sections are particularly helpful, giving the reader a genuine sense of what to expect with each career option, which run the gamut from baker to software developer to pet groomer... **Overall, an effective and user-friendly resource for high schoolers interested in someday starting their own business.**

Entrepreneurial-minded high school students will find valuable information here.”
