The revised and expanded edition of Salem’s library reference standard.

In this set, at the beginning of each essay, basic information is offered, beginning with the subject’s name as best known to Westerners. Nationality, ethnicity, occupation and historical role are included. Birth and death dates, reign dates and a summary paragraph highlighting the individual’s historical importance round out the introduction.

ORGANIZATION AND FORMAT
The body of each essay is divided into four elements: “Early Life” covers upbringing and environment. “Life’s Work” is the heart of the piece and is a straightforward account of the period during which the person’s most significant achievements were made. The significance of the person is examined and, finally, further reading is suggested in an annotated, descriptive bibliography which is the perfect starting point for further research.

EDITION DETAILS
The 17th Century is the fourth installment in the revised and expanded Great Lives series. Great Lives’ content now covers a wider geographical area and includes more women than earlier biographical collections from Salem. In The 17th Century, 192 new essays have been added, including 58 women and there are a total of 343 essays covering 351 historical figures.

NOVEMBER 2005

✓ Subject Index

The revised and expanded edition of Salem’s library reference standard.

The emphasis in this collection is on those turning points that redirected contemporary affairs and shaped the modern world. A broad sweep of categories is reviewed: arts and culture, colonialism, disasters, economics and trade, engineering and architecture, exploratory expeditions, government and politics, international relations, religion, science and technology, social issues, and war and civil unrest.

ORGANIZATION AND FORMAT
The events are arranged chronologically, forming a time line without regard to region. Hence, students can trace world history comparatively. To facilitate location of time periods within the publication, right-hand pages include date-range tabs and a chronological list appears in Volume 2.

Each article begins with a ready-reference listing that provides a summary of the event and its significance. The “category” and locale of the event are summarized and a list of the major figures participating in the event is offered.

EDITION DETAILS
Great Events has its origins in the 12-volume Great Events from History series and other events-based titles from Salem Press. Original content is enhanced by the addition of many new entries on Asia, Africa and the Americas. More than 75% (236) of the essays in the set are published for the first time. Entries include updated bibliographies, maps, primary source quotes and many illustrations.

NOVEMBER 2005
